

# Installing Large Expressions

1. After you have washed your wall and prepared your expression by rubbing over the entire surface with transfer tool, position it using small pieces of painters tape to temporarily hold it in place.

2. Once in place, run tape down center of expression vertically so it securely holds expression in place.

3. Slowly peel backing paper from one side of expression, taking care not to touch the adhesive on the back of the expression itself.

4. Using a small piece of tape, place it on the peeled back upper corner of the expression to temporarily hold it back to allow you to remove the backing (do not let tape touch the back of the lettering). At this point, the backing portion of the expression is hanging.

5. Using scissors, cut backing off as close the vertical piece of tape as possible.

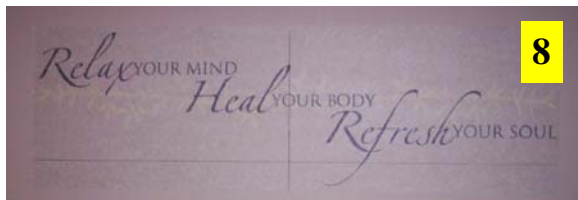

6. Remove small piece of tape from corner and working from the center, carefully lay expression on the wall using your burnishing tool to adhere it onto the wall as you go.

# Installing Large Expressions

7. At this point you can remove the center piece of tape from the expression. Now slowly remove backing from other half of expression, slowly removing it as you work from the center out, using your application tool to rub expression to the wall as you go.

8. After all backing has been removed and you have rubbed over the top of the transfer tape, you can remove transfer tape, removing it at an angle.

9. You are done. Enjoy your newly inspired space!
